

uzmaXODUS

Uzma with its technology partner, Xodus, is offering innovative solutions in integrated field development planning, concepts selections, and project management solutions.

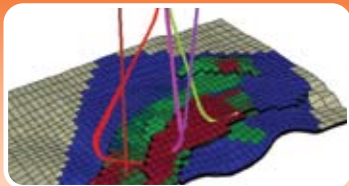

Integrated Field Development Planning

What is it?

- Long term collaboration arrangement for integrated subsurface and surface facilities engineering services.
- Both subsurface and surface engineers are working as an integrated team
- Bring joint regional experience sets to clients – truly world class and unrivalled.
- Independence from software, development solutions and construction company interests

Benefits to clients

- Provide decision making information (cost/schedule/economics/risk) earlier
- Reservoir and facilities work are screened early ensuring only value added work are performed
- One stop shop from basin study to concept selection – reduce development time and cost
- Efficient contract management – only one contract to manage

Reservoir Studies

- Reservoir characterisation
- Reservoir modeling
- Reservoir simulation
- Reservoir depletion scenarios

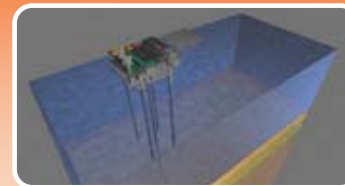

Well and Drilling Engineering

- Completion technology
- Well engineering
- Drilling engineering

Integrated Project Management

- Technical support to ensure post-FDP work meets development intent
- Management services
- Assurance Program

Integrated Asset Modelling

- Integrates reservoir characteristic, well properties, and surface facilities into one system to enable rapid concept screening

Facilities Concept Selection

- Small fields development
- Deepwater development
- Cost, weight, and schedule benchmarking
- Workshop facilitation for opportunity framing

Naza Haron graduated with BSc in Electrical Engineering from Valparaiso University, USA. Naza is an Executive Director of Uzma Group and heads the Project and Oilfields Operation Services division.

Uzma Berhad is an international Oil and Gas service company providing an array of services to the upstream sector across the exploration, development and production phases and to the downstream sector for facilities construction, operation and maintenance. Since the year 2000, Uzma has worked with over 48 clients worldwide helping them realise the value of their assets.

Xodus is a multi-discipline consultancy specialising in the independent delivery of consultancy services and production optimisation products that support the upstream oil and gas sector. With over 200 staff in the UK and Australia, Xodus Group comprises five divisions: Xodus Subsea, Xodus Oil & Gas, Xodus Technology and Xodus Environmental and Xodus Technical, Safety & Risk.
