

# uzmAMS™

The study will include:

- One to one discussion with key players including interfacing departments
- Review of current systems and documentation
- Review of current and future work programmes
- Brainstorming including a facilitated SWOT analysis

Before leaving the clients office we will prepare and present a report on the findings and recommendations, including:

- Results of documentation review (summary of strengths and weaknesses)
- Summary of brainstorming (including prioritised improvements)
- Proposed structure of the management system and documentation system
- Description of individual documents (including draft table of contents)
- Timetable and lump sum price with stage payments for preparation and implementation

## Uzma Advanced Management System Effective, Streamlined Management

Our management system team helps Exploration & Production companies control their risks and improve their performance primarily through the use of documented management systems. Expertise has been built over several years working for most PSCs in Malaysia and many operators throughout the Middle East, Asia and Australia. The teams roots are firmly in the E&P business; all the Senior Partners are geoscientist or engineers.

### Control Risk but Encourage Innovation

A management system is simply a structured framework of tools and controls that when used by a trained and competent organisation sets performance standards, control risk, measures results and captures learning.

Controls must be carefully balanced against the degree of risk and must not stifle engineering innovation or hinder the proactive style of management required to be a successful Operator.

Documentation prepared by Uzma is always concise and user friendly. We can help mature companies reduce their documentation from a room full to a briefcase full designed around an easily controlled electronic bookshelf.

#### Our main customers for Management System are:

- Shell
- Santos
- Woodside Energy
- Apache Energy
- Petronas Carigali
- Talisman
- Carigali Hess
- PTTEP
- Maersk
- Reliance Energy
- Dolphin Energy
- BHP Billiton
- Victoria Petroleum
- Egyptian Drilling Company

#### Our main countries for Management System are:

- Australia
- Brunei
- Malaysia
- Thailand
- Qatar
- India

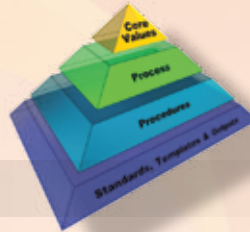

### The way we work

We do not offer off-the-shelf solutions; our services are tailor made to the clients' requirements. We can prepare new management systems or adapt and improve the existing system, implementing improvements in-line with industry best practice, corporate governance or legislative requirements.

In Australia we have helped a number of companies meet the NOPSA expectations for the management or safety in a self regulatory environment.

We work intensively with the end users but in a discrete manner never forgetting that they still have an operation to run.

Typical Documentation System
