

# uzmAPRES™

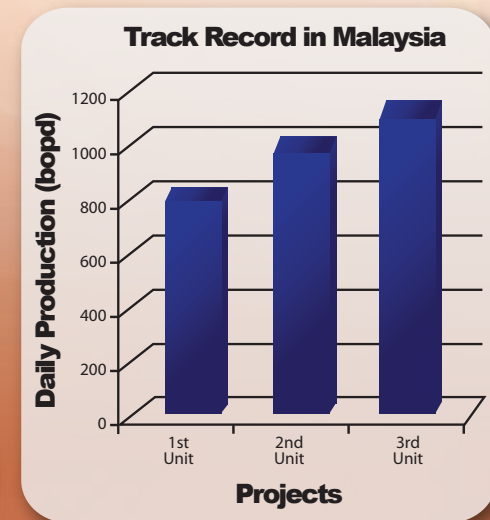

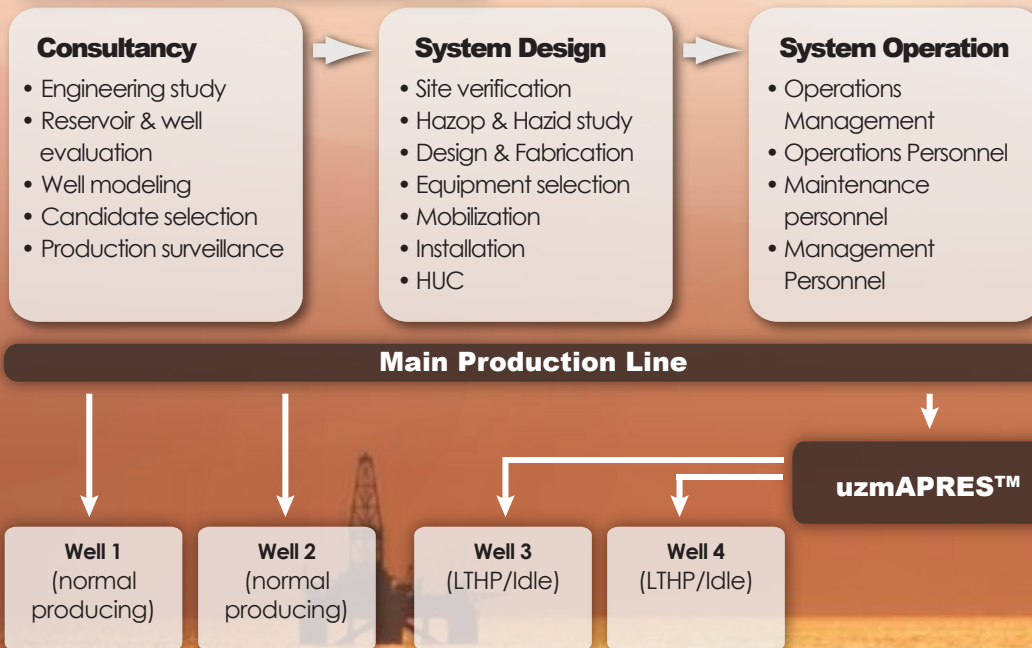

- No Capex required
- Immediate production
- No well intervention
- Quick deployment
- Flexible contract options
- Proven track record
- Integrated subsurface and surface engineering

## Uzma Advanced Production Enhancement System

uzmAPRES™ is an innovative total solution service package aimed at enhancing client field production within a short time cycle.

uzmAPRES™ introduce a surface pressure reduction which enabling the wells with low pressure to produce and boost them back to the main production line. This system does not require any down hole well intervention and surface system modification.

Naza Haron graduated with BSc in Electrical Engineering from Valparaiso University, USA. Naza is an Executive Director of Uzma Group and heads the Project and Oilfields Operation Services division.
